

# Extending XAML with Your Classes

---

**Thomas Claudius Huber**

SOFTWARE DEVELOPER

@thomasclaudiush [www.thomasclaudiushuber.com](http://www.thomasclaudiushuber.com)

# Module Outline

**Understand the  
default XAML Namespace**

**Create a 1:1 Namespace Mapping**

- Create and use a  
CustomerDetailControl

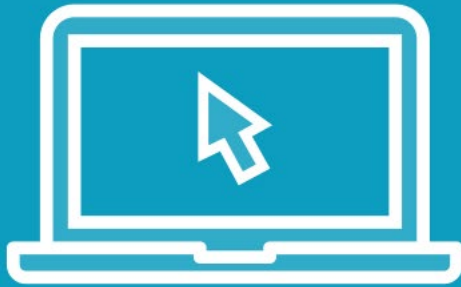

**Create a 1:N Namespace Mapping**

**Other XAML Namespaces**

- The XAML Language Namespace
- The Designer Namespace

# Demo

Understand the  
default XAML Namespace

# Demo

## Create a 1:1 Namespace Mapping

# Demo

Create and use a `CustomerDetailControl`

# Demo

## Create a 1:N Namespace Mapping

# Demo

## The XAML Language Namespace

## The Designer Namespace

# Summary

## Use your own classes and controls

- Create a 1:1 Namespace Mapping
- Create a 1:N Namespace Mapping

## XAML Namespaces

- Default XAML Namespace
- XAML Language Namespace
- Designer Namespace
